CMT uses a standard gothic font; this is similar to the Roman font used in printing, and the Arial font on the computer.

**ABCDEFGHIJKLM
NOPQRSTUVWXYZ
0123456789**

CMT can manufacture dies with any font required, including in signatures.

Over estimates of the size of the character required are quite common. The three marks to the right all have the same character size. The overall impression size will vary according to the depth of the mark; this effect must be taken into consideration whenever critical space limitations are a factor.

Standard sizes are: **1/32", 1/16", 3/32", 1/8", 5/32", 3/16", 1/4", 5/16", 3/8", and 1/2"**

Columbia Marking Tools is a leading manufacturer of marking products. Our hand tools are manufactured at our Chesterfield, MI location. Columbia is ISO certified to assure the highest quality of products.

Character Face Styles

Sharp Face Characters are engraved with a sharp edge. A sharp face tool penetrates more easily than other styles.

Flat Face Characters are engraved with a flat face instead of a sharp edge in order to produce a wider impression. This face is often used on brass or other non-ferrous metals. Since more material is displaced more force is required.

Open Face Characters have two sharp face lines to produce double line impression of an outline character. This style is used to emphasize trademarks or designs.

Ball Face Characters are engraved with a special rounded face for marking impressions with minimum stress at the point of marking.

Dot Style Characters are engraved with a series of rounded dots for the lowest possible stress when marking. Recommended for high pressure fittings, aircraft and other parts where sharp tools might disrupt the molecular structure of the metal.

Marking Pressure

Estimated Maximum Force per Hammer Blow (in lbs)

Size of Hammer	Average machinist	Experienced Machinist	The "Big Guy"
3/4 lbs	3,000	4,000	5,000
1lbs	4,400	6,000	7,400
1 1/2lbs	6,000	8,000	10,000
2lbs	9,000	12,000	15,000
2 1/2 lbs	12,800	17,000	21,200
3lbs	22,400	30,000	37,400

As the marking application requires a greater force, through a bigger swing or hammer, you just have to ask yourself -

"Who's going to hold the stamps?"

The number of characters marked at one time is limited by:

- The character size
- The material being marked
- The size of the hammer being used

Reality Check

Marking pressure per character (see static stamping pressure chart) x number of characters = Force required.

Marking Pressure Data
Static Stamping Pressure per character

Hand Stamps

- Columbia hand stamps will not split, mushroom, or chip.
- Lettering is deeply engraved.
- Produces deep, clean-cut impressions.
- Long tapering bevels ensure easy alignment.

Full Combination Sets Contain:

- Figure Sets
 - 9 Pieces
 - 0 thru 8 (figure 6 reversed for figure 9)
- Letter Sets
 - 27 pieces
 - A thru Z plus period

Shipped in sturdy wooden boxes with lids that serve as handy holders for storage.

Character Size	Shank Dimensions	Overall Length	Single Character*	Figure Set	Alpha Set
1/32	1/4	2 3/8	CMJ03-	CMJ0308	CMJ03AZ
1/16	1/4	2 3/8	CMJ06-	CMJ0608	CMJ06AZ

5/8	7/8	3 3/4	CMJ63-	CMJ6308	CMJ63AZ

* Please specify alpha/numeric character required after dash

R-Buster Hand Stamps

- Twice the size of heavy duty hand stamps: **5" Long!**
- Easy gripping (no two finger pinching required)
- Double pass engraved for extra clarity
- C custom heat treat for long life
- Easy alignment of characters with tapered bevels
- Soft hammer end to reduce chipping

**All Character
Face Styles**

Multi character is our specialty!

Multi-character stamps are useful for marking repeated numbers such as part numbers.

Please specify character size and number of characters as shown below. Include description of special font, character face, or logos required.

Hand Stamp Size Chart					
Character Size	Shank Dimensions	Overall Length	Part Number	Example	
1/16	1/4	5	CMH06-	CMH06-C#-XXX Where C# is the number of characters, and XXX is the characters	
3/32	5/16	5	CMH09-		
1/8	5/16	5	CMH13-		
5/32	3/8	5	CMH16-		
3/16	3/8	5	CMH19-		
1/4	7/16	6	CMH25-		
5/16	1/2	6	CMH31-		
3/8	9/16	6 1/2	CMH38-		
1/2	3/4	7	CMH50-		

Custom Hand Stamps

- Your own special design can be easily reproduced by furnishing us with a sketch.
- Symbol marking cannot be confused with any other marking, each stands out distinctively.
- All stamps available in low stress dot style or semi ball face design.

Symbols and other special hand stamps are used for:

- Quality control in marking machine
- Inspection
- Testing operations

Logos are useful for permanently marking company information.

Custom hand stamps can be manufactured with:

- straight
- curved
- concave (shown right)
- convex on the letter face.

Inspector's Hammer #8

The quick easy choice
for making an
inspector's ID mark.

Columbia inspector's hammers:

- Are ideal for use in industries requiring inspection markings of their products
- Hammer and head are one piece construction
- Constructed of forged tool steel with a shock absorbing handle

Symbols

Symbols

- Symbols can be engraved on any type, insert, or hand stamp
- Specify symbol required by SYM### after the catalog number of the stamp
- Some Symbols may require a wider blank than the standard letters

Numbers or Letters may be specified inside symbols

Hand Holders: H Series

- Recommended for the majority of marking operations requiring steel type for low volume/production marking applications with repetitive legends.
- Solid hand holder body with properly tempered non-chip head.
- Hardened replaceable stamp seat maintains uniformity even after the strongest hammer blows.

Hand Holders: HG Series

- Most economical handholder.
- Solid hand holder body with properly tempered non-chip head.
- Hardened replaceable stamp seat maintains uniformity even after the strongest hammer blows.
- HG Hand holders feature a spring clip release. This assures an accurate alignment of the characters.

Hand Holders: R Buster Series

- Safety comes first. Large hand shield protect hand and fingers from hammer blow.
- Replaceable hammer end cap, ensures long tool life.
- Solid hand holder body with properly tempered non-chip head.
- Hardened replaceable stamp seat maintains uniformity even after the strongest hammer blows.

A close-up photograph of a metal padlock. The padlock has a diamond-plate texture on its body and a combination dial with numbers 0-9. The dial is partially open, showing the internal mechanism. The padlock is shown from a side-on perspective, highlighting its robust construction.

- Character sequence changed by convenient spanner wrench
- Consistent uniform character alignment and depth
- One piece wheels
- Pawl block aids in maintaining wheel alignment
- Accurately engraved wheels for precision
- Created from high grade steel and heat treated for long life

- 30P press shank (shown above)
- 30D dovetail style mount
- 30H hand shank (shown at left)

Char. Size	Number of Wheels

Press Holders

Standard shank dimension is 1 1/4" diameter by 2" long. Others available upon request.

Columbia designs and manufactures special press holders per customer request.

CMT Press Holders:

- Are recommended for marking on flat surfaces with CMT steel type
- When combined with CMT type fonts they create a large variety of character combinations
- Are durable and wear resistant
- Standard shank dimension is 1 1/4" diameter by 2" long

Radial Press Holder and Dies

Ideal for Marking:

- Gear blanks
- Cutter
- Pulleys
- Shafts
- Bearings
- Wheels
- Bushings

CMR Radial Type holders are designed to specific customer requirements for marking circular impressions on flat surfaces.

When Ordering CMR Radial Type holders Please Specify the Following Information:

1. Character Size
2. Radius to enter of character (R1)
3. Number of Recesses
4. Type Capacity of Each Recess
5. Shank Diameter (SD) & Length (SL)
6. Pilot Diameter (PD) & Length (PL) Required
7. Quantity of Letter & Figure Type Required
8. Quality of Spacers Required

To order CMR Radial Type and multi-character segment stamps use:

- Catalog number listed in the table below
- Plus actual letters, figures, or multi-character legend

IMPORTANT:

Please include part number of holder when re-ordering stamps

CMRA Style

CMRB Style

Char Size	CMRA Style		CMRB Style		Blank Spacers

Air Hammer

Columbia's Air hammers:

- Use low cost CM8X round hammer inserts or CMG rectangular type
- Indents up to 1/4" characters in tool steel
- Compact, light-weight (2 1/2lbs)
- Requires only a 3/8" air hose for operation
- Only two moving parts assures long trouble-free operation

Dimensions: 8.6" x 6.5" x 2.5"

Columbia Air Hammer Model 75/85

Model/Feature	Symbol	Example 75AT-OB
75 Standard Power Range	75AT	
85 High Power Range	85AT	
Rod Style B (round insert)	OB	
Rod Style A (CMG type)	OA	
Rod Style AS38 (CMG type)	OAS38	

75FRL is for use with model 75, 85, and 95 hand held air hammers

Recommended Air Hose: 3/8" I.D. min
Operating Pressure: 20 to 80psi
Max. Marking Pressure: Model 75AT is 1500lbs (at 80psi), Model 85AT is 2500lbs (at 80psi)
Stamp Capacities Rod Style "B"
 (1) Pc CM8X round insert
Stamp Capacities Rod Style "A"
 (4) Pc's 1/16 Char. (CMG06 Stamp Inserts)
 (2) Pc's 1/8 Char. (CMG13 Stamp Inserts)
Stamp Capacities Rod Style "AS38"
 (6) Pc's 1/16 Char. (CMG06 Stamp Inserts)
 (3) Pc's 1/8 Char. (CMG13 Stamp Inserts)

Filter Regulator Lubricator and Hose

075FRL	FRL with no hose
075FRL15	FRL with 15 feet hose
075FRL20	FRL with 20 feet hose
075FRL25	FRL with 25 feet hose

POW-R-MARK

Features:

- Maximum force by a hand held air powered marking tool: 8000 lbs
- Easy to handle with minimum recoil
- Low Weight With Holder: 8 lbs
- Length With Holder: 14.5"

*Simply snap
the holder on
and off.
NO TOOLS!*

Recommended Air Hose: 3/8"ID min
Operating Pressure: 20 to 80 psi
Recommended Air Hose: 3/8"ID min
Max Marking Pressure: 8000 lbs at 80 psi

Stamp Capacity Rod Style "A"

2 pcs. 1/8" CMG13 type

4 pcs. 1/16" CMG06 type

Stamp Capacity Rod Style "B"

One CM8X style inserts. That can mark up to one 1/4" character or be engraved to suit your needs.

Rod Style "N"

Use with standard 95N holders to mark more characters or special holders for staking and seating.

Columbia POW-R-MARK		
Model/Feature	Symbol	Example 95-ON
95	95	
Rod Style A (CMG type)	OA	
Rod Style B (round insert)	OB	
Rod Style N (for holder)	ON	

95 N Holder CMG Style Type Capacity									
Holder Model	A	B	1/16	3/32	1/8	5/32	3/16	1/4

95NB-75	.31	.75				4*	4		
95NC-50	.38	.50							2
*Use CMG16W groove type									
**Requires use of blank spacer to fill out pocket									

Steel Type and Inserts

The process of engraving stamps and inserts that CMT uses assures for a longer stamp life. These stamps and inserts are made from select tool steel and carefully heat treated. They stand up best under high production marking conditions.

Measuring Letters & Figures

The character size is measured from the tallest part of the stamp die. When the stamp die indents into the metal the mark will be larger. The most common error is to overestimate the character size.

To order individual **LETTERS** and **FIGURES** add suffix of actual letter or figure to part number

To **BLANK SPACERS** add suffix of "-00" to part number

To order **PUNCTUATION** add suffix from table below to part number

CMG	09	-A
Style	Char Size	Letter or Figure
